Insurance solutions from the people who know what you grow.

Red Horse Crop Insurance (RHCI) is a reputable provider of crop insurance that strives to provide growers with a line of protection against multiple perils. We bring experience and professional top-notch dedication to your operation.

You might be wondering, "why did Mustang Seeds decide to get into crop insurance?" The answer was pretty simple. We feel that through our relationship with your seed decisions, we can provide the protection needed to provide you with full-season protection. That's why we've put together a great team to add to our Red Horse family and expand our product offering.

Expect a family owned experience when doing business with RHCI!

PROTECTING YOUR FUTURE

CROP HAIL INSURANCE

The devastation left in the wake of a hail storm can be partial or total. Regardless of the amount of damage, it's always expensive and all of the good farming practices in the world won't prevent it. Crop Hail coverage gives you acre-by-acre protection up to the actual cash value of your crop, thereby protecting your investment and your future.

CROP HAIL FLEXIBILITY

Your ProAg agent works with you to design crop hail coverage to fit your risk management strategy, and flexible deductibles allow you to tailor the cost of your crop hail policy to meet your budget.

Your crop hail policy may also provide coverage for perils other than hail. In many areas, basic hail coverage includes:

- Fire & Lightning
- Transit
- Reimbursement of replanting costs
- Carry-over coverage
- Vandalism
- Stored Grain Coverage

CROP DECISION MAKING

Hail is the one catastrophe that is most likely to totally destroy a part of your crop and leave the rest undamaged. The acres and loss of crop yield caused by hail damage may well be less than the deductible of your federal crop insurance policy, or it may not lower your yield enough for a revenue insurance policy to protect your profits. Crop hail insurance can fill that gap. While federal crop policies protect you against losses severe enough to significantly drop the yield per insured unit, crop hail insurance gives you acre-by-acre protection that can be up to the actual cash value of the crop. Crop hail is especially important to those with area risk policies, like ARPI, which leaves individuals exposed to spot losses due to hail. You can also buy additional crop hail coverage during the growing season (prior to damage) to protect added profit potential from bumper yields or higher-than-normal crop values. Even if your frequency of hail damage is low, remember that crop hail coverage is rated for your area. It is an inexpensive way to protect against hail damage.

Red Horse Crop Insurance is a reputable provider of crop insurance that strives to provide growers with a line of protection against multiple perils. We bring experience and professional top-notch dedication to your operation.
