

S-8751

S-8751 is best adapted for high quality dairy silage environments where it produces high quality silage because of its large grain head and low lignin content in 85 to 90 days.

Key Advantages

- Best for high quality silage
- Low lignin content
- High grain-to-forage ratio
- Consistent tonnage under irrigation
- 6' to 7' tall with excellent standability
- Average stalk sweetness
